Professional Summary

Self-taught MERN Full-Stack Developer with a passion for building scalable web applications. Experienced in **React, Node.js, Express, MongoDB, and Redux,** with a focus on clean code and efficient problem-solving. Developed and deployed full-stack projects, including a **memory-sharing platform, a locally saved to-do app, landing pages, and a Bible verse fetching site**. Highly adaptable, detail-oriented, and eager to learn new technologies. Seeking an opportunity to contribute to a dynamic team and build impactful digital experiences.

Employment History

Full-Stack web developer, Freelance. Remote
Jan. 2024 - Present

- Developed a **full-stack memory-sharing website** using the **MERN stack** (MongoDB, Express.js, React, Node.js), featuring **CRUD operations, and image uploads**.

- Built a **locally saved to-do app** using **React.js** and **localStorage**, enabling users to manage tasks efficiently.

- Created **landing pages** with **HTML, CSS, JavaScript, React, and Tailwind**, ensuring **responsive design** and **SEO optimization**.

- Developed a **random Bible verse generator** using **React.js and an API**, fetching and displaying verses dynamically.

- Deployed projects on **Render and Netlify**, handling **version control with Git and GitHub**.
